 Cattle, Kine, with Verjuice, Horses  
 with Water and Ground Malt,  
 foddered with a little Bran.  
 In this month let not Blood,  
 nor use Physick, unless necessity  
 constrain thee. Beware of taking  
 cold, for Rheums and Flegm do  
 much increase this month. It's  
 hurtful to fast long; to drink  
 White Wine fasting is good. Use  
 Meats that are moderately hot,  
 for the best Physick is warm Diet,  
 warm Cloaths, and a merry ho-  
 nest Wife.

This Month cut, set, and lay Quicksets and Roses, as all other Plants. Set and plant Vines, Hops, and all fruit that grows on bushes. Sow Pease, Beans, and Onions: furnish your Gardens with Salads and Pot herbs for Summer. Prune and trim all sorts of Fruit-trees from Moss, Canker, and superfluous branches. Remove Grafts of young Trees in the last quarter, the Moon being in *Aries, Libra, or Scorpio.*

If necessity urge, you may let Blood, but be sparing in Physick, and be sure when a warm day comes to prevent coming of cold through carelessness, for the warm Air this Month is not lasting, but oft deceives us to our prejudice.

In this month slimy Fish, Milk, and the like, that do oppilate and stop the Liver and the Veins, and thicken the Blood, are to be eschewed as enemies to health.

This Month commands the provident Housewife, and the prudent Artift, to set their Stills on work. In the beginning of the Month sow and set those tender Summer Herbs that would not endure the former cold. Weed your Hop Gardens, cut off superfluous Branches. Moss Trees and Gardens, and weed Corn; rise early, walk the Fields and Gardens.

Now every Garden and Hedge affords thee Food and Physick. Rise early, walk the Fields by running Streams, the North and West sides. Sage and Sweet Bitter, an excellent break-fast. Clarified Whey with Sage. Scurvey-Grass Ale, and Worm-wood Beer, are wholesome Drinks. Green Whey excellent against Choler, Eat and drink betimes in the morning. Abstain from Meats that are hot in Nature, and salt in Quality.

# Observations on September.

Last quarter the 6 day, 28 min. past 4 in after.  
 New Moon the 14 day, 49 min. past noon.  
 First quarter the 22 day, 42 min. past 3 in after.  
 Full Moon the 29 day, at 11 in the morning.

D.	☉	☽	S	The beginning of this month, & the end of the former gather Hops, their complexion being brown, and the weather fair, and no dew on the ground. Kill Bees; make Verjuice, remove and set all slips of Flowers between the two Lady-days; re- move Trees from September till February, especially in the new of the Moon. The weather warm, and the Wind South or West, cut Quicksets, gather ripe Fruit, sow Wheat and Rye, Winter Parsnips and Carrots; and set Roses, Straw- berries, and Barberries. Now as the year declines, pro- vide your Winter Garments, hang them on loosely, to prevent that you might after repent of. Good for Physick and Phlebotomy. Note, that <i>Venus</i> is our bright Morning Star, from the beginning of the year till <i>August</i> 24th, thence to the years end our bright Even- ing Star.

Set Crab-tree stocks to graft on:  
 In the old of the Moon, set Pease  
 and Beans, and sow Parsnips and  
 Carrots: Trench Gardens with  
 dung, uncover the roots of your  
 Apple-trees, and so let them re-  
 main till *March*. Kill Swine in  
 or near the Full of the Moon, and  
 the Flesh will the better prove in  
 the boiling.

The best Physick this month is  
 good exercise, warm and whole-  
 some meat and drink; but if any  
 distemper afflict the body, finish  
 your Physick this Month, and so  
 rest till *March*, unless necessity  
 urge: use good meat, and whole-  
 some drinks to nourish the blood:  
 be sure to go dry of your feet, for  
 if not, (unless it be those always  
 used to it) be certain to be trou-  
 bled with Rheums, and cold, and  
 other inconveniences attending.
